### At A Glance

- Koppers is the world's largest distiller of coal tar, a byproduct of the transformation of coal into coke.
- Koppers carbon materials and chemicals are essential to the making of tires, aluminum and steel. They increase the durability of utility poles, bridge coatings, raincoats and paint.
- Koppers is the world's largest producer of treated wood products. Treated wood creates more durable structures that resist decay, thus increasing safety, reducing replacement costs and preserving valuable forests.
- Koppers is the largest provider of railroad track crossties and is a leading producer of creosote treated wood poles for electric and communication industries.
